

## Assist Your Stomach

To Get Rid of the Poisonous Gases and Fermenting Food.

A good long fast will do this sometimes. A trip to the mountains. Tramping. Roughing it. Yes, very good remedies.

But are you going to avail yourself of either one of these remedies. No? Then the next best thing is to try a bottle of Peruna. Take it according to directions. You will have a natural appetite. All gas and fermentation in the stomach will disappear.

Read what Mrs. Emma Bell, Box 204, Fort Pierce, Florida, says: "I was taken suddenly with swelling of the stomach and bowels, and great distress. Very painful. Three doctors gave me no relief. Could not eat anything. Everything soured. I was starving to death. I began taking Peruna and was soon strong enough to do work. After taking five bottles I can truthfully say I am well. I gained twenty pounds."

### Light Fingered Cops.

Large patent leather gauntlet gloves are now a part of the regulation uniform of the traffic squad of the St. Louis police force. They were tried out at directing traffic by signals at night and in dense fog, and were found to be a great aid. The gloss surface of the gloves reflects the beams of light that strike it and they can be clearly seen for two blocks at night. In a fog they are visible long before the figure of the officer can be discerned.—Popular Science Monthly.

**Drives Out Malaria, Builds Up System**  
The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILL TONIC, drives out Malaria, enriches the blood, and builds up the system. A true tonic. For adults and children. 50c.

## WITHHOLD NAME TO SHIELD GIRL

### BLACKMAIL GOES ON

**Wealthy Iowa Merchant Will Be Unidentified Until His Daughter Can Be Married.**

Chicago, Sept. 28.—To save a young girl from embarrassment, federal officials today promised to withhold the name of the wealthy Iowa merchant recently fleeced out of \$10,000 by blackmailers and to delay arrests in the case until after October 20, the wedding day of the merchant's daughter.

Warrants for the arrest of two young women and a Chicago attorney, charged with blackmailing the merchant and using the Mann act as a club, have been issued.

The merchant, a widower, in his plea to H. G. Clabaugh of the department of justice here, said he feared exposure now would wreck his daughter's happiness.

Budga Godman, alleged to be implicated in the blackmailing of Edward R. West of Chicago, a tea importer, out of \$15,000, was formally arrested today on a warrant charging her with conspiracy.

She is made a codefendant with Homer T. French, George Irwin and "Doc" Brady, who have been named in similar warrants.

She is charged with having induced West, a widower, to take her to New York and with having entrapped him in a hotel so her confederates, posing as government agents, could arrest them on fake Mann act charges. Bail was fixed at \$25,000.

### An Easy Way To Reduce Flesh

Drink Hot Water and Take Tassco.

Haven't you often wished for a medicine to reduce your flesh? Something that does not require dieting or calisthenics? Well, right here you have it in 5-grain tassco tablets, which you may secure at your druggist. They are pleasant to take, perfectly harmless and cause no restrictions of habit or eating, and reduce the flesh, little by little, until you are down to the number of pounds you wish to weigh. Too much flesh is undesirable, as most quiet, stout people will readily admit, and it detracts from one's good appearance; makes one clumsy and short of breath.

There isn't any reason why anyone should be too stout, when there's this much-tried, perfectly satisfactory remedy at any good drug store. Tassco tablets (don't forget the name) are recommended by physicians and are guaranteed to be perfectly harmless. Refuse substitutes, if you can not come to our store, we will mail tassco to you.

## ORCHARD AND GARDEN

**Orchard and Garden Work This Week and Next.**

October is a good month for putting out bulbs.

Plant a few rows of spinach now for early spring cutting.

Make a sowing of radishes now and another sowing a week later.

The strawberry makes its greatest growth during the cool weather of early fall; hence the advisability of fertilizing the strawberry patch at this season.

Are you growing your own cabbage plants for early spring setting? Seed should be sowed by the end of September.

Be sure to start a strawberry patch this fall. A small crop of berries can be obtained next year from plants set at this season.

In ordering fruit trees, see that you include at least a few of all the fruits that do well in your locality, with varieties of good quality that ripen in succession.

If you wish to propagate your own fruit trees, plant the seed now by sowing them in rows and covering two or three inches. Peach, plum, and cherry will be ready for budding next summer if planted in good soil.

It is a good time now to work out the strawberry patch. Remove runners that have been allowed to take root between the rows, cultivate thoroughly, and fertilize. Also, it is well to mulch the plants heavily at this time rather than in spring, for the reason that winter rains will be retained, furnishing as a consequence a more abundant moisture supply during the fruiting season when it is most needed.

### Plant Sweet Peas This Fall.

Until a few years ago people had the mistaken idea that it was impossible to plant sweet peas in the fall successfully. Being aware of the fact that experience is the best teacher known, three years ago I experimented, and the results have been all that could be wished for.

A great deal of the success with sweet peas depends upon careful preparation of the soil. Study where would be the best location, selecting a sunny spot where the soil is soft and loamy and well drained. Have a deep trench dug about one foot wide and two feet deep. In the bottom of this it is well to put a layer of old tin cans or corn stalks, to keep the soil thoroughly drained. Take well rotted stable manure and fill the trench one third full, then draw in enough soil to fill it two-thirds full. Mix the soil and manure thoroughly, and you are then ready to sow.

From the first of October to the first of November in this country is the best time to plant. I buy the Spencer varieties, assorted colors; they come a little higher than the common varieties mixed, but "the best" will always pay in buying seed. By planting in the fall of the year, you will have the advantage over your neighbor, for when your peas are blooming profusely in the early spring hers sowed in February are just beginning to run.

Sow the seed rather thickly so that if the winter is severe there will then be a good stand. Cover about three or four inches, leaving several inches of the furrow still open. After the seed are up and beginning to grow quickly, draw a little of the soil around the roots, gradually filling up the open furrow.

As soon as they are ready to run, I watch them closely to see that each vine gets started up the wire. The

common wire netting is best, but if that is not convenient, common twine can be used. Put in small stakes every three or four feet and beginning at the end of the row, put a straight row of twine both at top and bottom; then weave your twine back and forth. You will be pleased with the results, as after the vines have covered it, not a sign of twine is visible. Dry twigs and small branches stuck in the ground are very good for the vines to cling to, especially in the country where one can get these so easily.

I make three plantings: In October, November and February. This gives me a profusion of flowers from early spring until July. When one lives near a town, there is splendid opportunity to make much pin money out of the sweet peas. I have calls for nearly all I grow, and besides the actual profit from mine, I feel amply repaid for the trouble by the happiness the sweet peas bring to so many unfortunate and sick.

PRECIOUS HAHN.

Hickory, N. C.

### Largest Potatoes Do Not Always Win at Fairs.

Did you ever notice that the largest potatoes do not always win at the fair? Size is not the most important consideration in selecting a sample. F. M. Rast of the University of Florida College of Agriculture lays emphasis on the uniformity of the sample and the neatness of the package. Two or three big potatoes in a bushel or an unattractive package will spoil the effect of an otherwise good exhibit.

Mr. Rast gives the following points to be observed in making an exhibit of sweet potatoes: "Do not select large, overgrown, irregular potatoes. Medium sized potatoes are best. Have all potatoes in the package of the same general size. Deformities and irregularities detract from the appearance. Diseased or bruised potatoes are not desirable. Exhibit at least one bushel. A well made and attractive package will help to win. The first five points are extremely important in selecting the sample."

For Irish potatoes he offers the following points: "Select potatoes with smooth skins and few eyes. Very large potatoes are hard to cook, uneven in texture, and, therefore, undesirable from a domestic viewpoint. Uniform size and regular shape are important considerations. The best color for the flesh is white or creamy. Potatoes with an acid taste should be avoided since such taste indicates age. Potatoes should not be watery. They should feel firm when pressed in the hand. Those with large or soft covers are not desirable. Exhibit at least one bushel in a neat attractive package."

### How to Prepare Show Fruit For Exhibition.

Perhaps the first necessity in preparing show fruit for exhibition purposes is a clean, white glass receptacle.

For bleaching such fruits as Niagara grapes, lemons and yellow peaches, place the fruit in a solution of one quart sulphurous acid to one gallon of water.

For preserving any fruits or vegetables a one and one-half per cent solution of alcohol and a five per cent solution of zinc chloride will be found best. This solution may be used immediately or may be kept for any length of time.

It must be remembered that fruits or vegetables done in this way are poisonous and must not be eaten. They are for show purposes only.

### ATTRACTIVE WOMEN

#### SWINDLE TRAVELERS

**Blackmailing Scheme Said to Be in Operation on Trains Crossing State Lines.**

New York, Sept. 28.—A blackmailing scheme reported to be in operation on railroads crossing State lines by which attractive women swindle male travelers with the aid of men accomplices is being investigated by special agents of the department of justice, it was disclosed here today. Information of the swindle was sent anonymously to John C. Knox, assistant district attorney, who is in charge of the "blackmail syndicate" cases in New York and other cities.

The informant told Mr. Knox that while traveling recently from Portland, Ore., to St. Louis he was nearly trapped by one of the women and afterward learned from a Pullman porter that the "badger game" was being played by women traveling regularly on that line.

### MYSTERIOUS PAINS AND ACHES

**Make Life Hard to Bear For Many Lancaster Women.**

Too many women mistake their pains and aches for troubles peculiar to the sex. More often disordered kidneys are causing the aching back, dizzy spells, headaches and irregular urination. Kidney weakness becomes dangerous if neglected. Use a time-tried kidney remedy—Doan's Kidney Pills. Hosts of people testify to their merit. Read a Lancaster case:

Mrs. H. M. Parks, Market St., Lancaster, says: "I ached all over and when I sat down, I got so stiff across my back I could hardly stoop and it was hard for me to do my housework. I finally got a box of Doan's Kidney Pills at the Standard Drug Co. and they brought me lasting benefit from the backache and fixed my kidneys up in good shape."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Parks had. Foster-Milburn Co., Props., Buffalo, N. Y.
